How to Do Well on My Exams

1. Know the notes word for word (since I don’t give out or post my lecture notes or Power Point slides, it’s very important to take good notes). I strongly recommend flash cards to study from!

2. Know the CTQ answers for each exam.

3. Know the information from the class discussions.

4. Study for each exam like it’s the final exam and like you know you should by studying for each exam the day you first receive notes for that exam so that cramming and stressing out can be avoided, so that you can actually enjoy studying, and so that learning and grade satisfaction are maximized.

5. Follow the exam instructions carefully.

*Make sure to especially know the notes. Whenever there is a difference between the notes and the textbook, go with the notes because the information is more up to date.
