How to Do Well on the Exams

1. Know the notes.

2. Know the general points/ideas in the chapters being tested on.

3. Know the CTQ answers.

4. Know the information from the class discussions.

5. Don’t procrastinate in knowing the above (start studying for the exams right after the first lecture).

6. Follow the exam instructions carefully.

*Make sure to especially know the notes. Whenever there is a difference between the notes and the textbook, go with the notes because the information is more up to date.
